AERONAUTICAL INFORMATION CIRCULAR

ENDORSEMENT OF AIRCRAFT TYPES NOT ON THE ZIMBABWE REGISTER

CAAZ normally endorses only aircraft types that are on the Zimbabwe register on a Zimbabwe flight crew licence. However, CAAZ may also permit the endorsement of aircraft types on a licence in respect of aircraft types which are not on the Zimbabwe register but are accepted for flight training and tests in a CAAZ approved Aviation Training Organisation (ATO).

An applicant seeking such an aircraft type rating endorsement must enrol in the CAAZ approved ATO and complete the required ground training, flying and/or simulator training. The applicant is also required to pass the relevant CAAZ ground examinations and flight tests to qualify for the aircraft type endorsement sought.

The types of Aircraft that are to be endorsed on a Zimbabwean licence, but not on the Zimbabwe register, are those which CAAZ has full safety oversight capabilities on ie there should be at least one qualified CAAZ operations inspector and one qualified Airworthiness Inspector on that platform.
